

# G&L Pump Series A-C 8300 – Split Case Pumps

Commercial Split Case Pumps  
G&L A-C Series 8300 & 8300RS

Double-suction, base-mounted AC 8300 Series pumps are available in 2" through 10" sizes. Motor sizes through 300 HP. Flows to 6500 GPM and heads to 400 feet. Bronze-fitted construction with a maximum working pressure of 175 psig. The G&L A-C 8300 features internally self-flushing mechanical seals for maximum lubrication, debris removal and heat dissipation.

The internally flushed seals allow for a shorter shaft for reduced deflection for longer seal life. Closed-end steel baseplate with full seam welds for strength and an open top for easy grouting. The pump bearings and mechanical seals can be serviced without disturbing the upper casing half, piping connections or electrical motor connections. An ANSI-OSHA-compliant coupling guard shields the flexible coupler.

## G&L Pump Series A-C 9100 – Large Split Case Pumps

Double-suction, base-mounted Series A-C 9100 pumps are available in 6” through 24” sizes. Motor sizes through 4000 HP, flows to 40,000 GPM and heads to 600 feet. All are bronze-fitted construction with working pressures available up to 300 psig with 250# ANSI flanges. Externally flushed mechanical seals are standard features on this series.

The pump bearings and mechanical seals can be serviced without disturbing the piping connections or electrical motor connections. Its base plates are fabricated steel with drip pan. An ANSI-OSHA-compliant coupling guard shields the all metal gear type coupler.

### **Applications:**

General Industry

Water supply Condenser

Water transfer Chilled and hot water circulation

### **Features and Benefits:**

- Long coupled, base mounted, single stage, double suction, horizontally split case design, in cast iron bronze fitted construction specifically designed and guaranteed for quiet operation.
- The pump internals are capable of being serviced without disturbing piping connections or electrical motor connections.
