

Housings and Silencers

EmeraChem introduces "Best in Class" Catalytic Reactor Housings and Silencers

We provide a true integrated solution and performance guarantee for both Oxidation and NSCR applications, while featuring the industry's most unique functional and rugged designs.

Our expertise in IC applications has enabled us to develop a product that is field service friendly for all sizes, makes and models of stationary engines.

- Superior heavy-wall construction in carbon or stainless steel
- Individually mounted elements
- Unique gasket design
- Superior edge-mounted seal eliminates by-pass during thermal cycles
- External, single point element mounting design
- Installs in a variety of positions and configurations (e.g. 180° horizontal, vertical, end or side entry and exit)
- Available for critical and hospital grade sound attenuation
