

# PED DRAIN MASTER PREMIUM ELECTRONIC DRAINS

The Parker Airtek PED 'Drain Master' Condensate Drain is designed to effectively remove drain liquids from filters, air receivers, air dryers, separators, after coolers and other compressed air equipment where liquids may accumulate. The PED 'Drain Master' Condensate Drain is an excellent replacement for float type drains which have a tendency to stick open when water and oil combine into sludge. The Drain Master dual time feature not only makes installation easy but the drain is useful over a wide range of applications without wasting air. In addition, the use of two lights for indicating power on and the valve open status further simplifies installation and makes visual checks easy. There is no guessing with the PED 'Drain Master' Condensate Drain.

## Features & Benefits

- Fully adjustable cycles
- UL, CDA certified
- NEMA 4 enclosure
- Viton seal
- Power cord
- Large orifice
- Two indicator lights
- Test mode
